situation: A new bespoke headquarters for Mazda Australia. **solution:** Large open spaces and full height ceilings throughout the new Mazda Headquarters called for an attractive acoustic ceiling lining to ensure the ambience befitting to a contemporary car showroom. Cox Architects worked closely with Atkar to develop the design of a warm timber ceiling that would complement the white floor adding a touch of elegance and class. Atkar supplied samples prior to ensure consistency and confidence. All the panels were supplied and installed ahead of schedule. An excellent installation resulted in a smooth streamlined finish.

1_ Acoustic balance in the background of complexity
