situation: Refurbishment of an old building into a boutique new deli and cellars. **solution:** Not wanting to be characterised by the clamour of a typically noisy convenience store environment, acoustic absorption was imperative to balance the atmosphere and set Boccaccio Cellars apart as a boutique Mediterranean deli and liquor merchant. Characterised by hard surfaces such as polished concrete, metal shelving, glass fridges and freezers, Atkar collaborated closely with Peter Harvey & Co to establish a unique upmarket feel. The American Walnut finish adds a touch of warmth in striking contrast to the polished concrete floor to enhance the customer experience. The Au.diSlat delivers a seamless flowing result with maximum flexibility enabling services and lights to be easily integrated. Thanks to our unique panelised design, Au.diSlat was also quick to install.

1_ Streamlined noise control
2_ Warming contrasts
