situation: An interior fitout demanding the highest environmental accreditation. **solution:** Atkar's FSC certified Au.diSlat was the perfect solution to fit the architects exacting brief for a decorative linear timber acoustic ceiling that met strict environmental criteria. Two contrasting finishes were required: American White Oak, stained warm medium brown for the main ceiling areas together with white high gloss ceiling panels for lift lobbies. Significant ceiling heights, angled panels and complex services fittings further demonstrate Atkar's commitment to deliver beyond expectations.

- 1_ Continuous flow
- 2_ Streamlined lift lobbies
- 3_ Superb acoustic performance
- 4_ Warm and functional
