Acoustic Linings | Wall & Ceiling Systems

Huntingtower School Auditorium, Mount Waverley

Au.diStyle / Au.diTouch / VoglFuge

Project Huntingtower School Auditorium, Mount Waverley
Architect Baldasso Cortese
Builder SJ Higgins Group
Products Au.diStyle custom curved deflector ceiling panels finished in Inlux Image Tasmanian Oak
Au.diTouch premium tailor-made acoustic fabric wrapped acoustic panels
Voglfuge 8/18R perforated acoustic plasterboard ceiling panels with Integrated Acoustic Backing (IAB)

Situation A state-of-the-art auditorium at Huntingtower School

Solution This project required a highly customised solution to create a complex ceiling incorporating raked, curved and flat dimensions. Atkar consulted closely with the project architects Baldasso Cortese to design this unique solution which favours acoustic refraction over the conventional sound absorption, allowing sound to be directed around the auditorium.

Our Au.diStyle decorative panels were customised and finished in Inlux Image Tasmanian Oak alongside our Au.diTouch premium fabric wrapped acoustic panels, used to encase the speakers. Given the complex nature of the highly customised deflector curved ceiling panels & steel fixture frame, Atkar constructed 3D drawings and a prototype for the architects to sign off. During the installation process Atkar were on hand to assist SJ Higgins Group to ensure a smooth fitting of the ceiling panels and an exceptional end result. Voglfuge was used in the corridors and entry space to create an impressive seamless ceiling. The end result - a compelling aesthetic & superb acoustic performance.
