Key features

Flexibility in function and design.

Mirage 3D is ideal for applications including feature walls, ceilings, bar fronts, merchandising displays and can be cut to any size.

Distinctive three-dimensional effect.

Durable and non-porous, Mirage 3D display illusionary effects when combined with subtle directional lighting. The shadows created present stunning variations across the contoured surface.

Range of patterns and finishes.

With a large selection of colours and woodgrains including a plywood option, Mirage 3D offers a unique design to any space.

Saves time and money.

By eliminating the need for on-site preparation and finishing, and easy install with our fixing system. Mirage 3D instantly brings life to your space.

More than just products.

We know that in the design and construction industry, you need more than just a high quality product. You need a trusted partner who can provide you with the complete package. Atkar Architectural offer ongoing service support from specification through to construction, to ensure our products go 'beyond expectations' for you and your clients. We're driven to make your projects exceptional.

Inlux Finishes Range_____ We can tailor a finish solution to your design requirements or choose from our Inlux Range of premium laminate, timber veneer, 2 pack paint and fabric finishes.

Concealed Fixing Systems_____ Providing a seamless and integrated look, our Au.diMount fixing systems are also easy to install.

Dedicated Architectural Consultants_____ Who will work one-on-one to find the best design solution to meet your needs.

Experienced Engineering Team_____ Who can develop shop drawings and customised solutions to meet even the most complex designs.

On-Site Assistance_____ We offer ongoing installation and product support for builders and contractors.

Environment_____ We are committed to best practice by using veneers from FSC certified forests, EO rated substrates and low VOC coatings.

Locally Designed and Manufactured_____ Made in Australia, our superior production capabilities allow for full customisation and shorter lead times.

Acoustic Testing_____ Our panels are laboratory tested and certified to perform highly effective noise control.

Fire Ratings_____ We are passionate about safety and rigorously test our panels by certified laboratories to meet BCA and industry standards.
