

Vogl Colour

Acoustic Plasterboard just got colourful!

Vogl Colour allows you to add colourful features precisely and easily to your project.

The panels are factory treated, ensuring high-quality and a homogeneous colouration. With the option to select different colours to the finish coat, inner perforation, and fleece colour – the choices are endless!

Combined with the Smarter, Faster and Better VoglFuge process, Vogl Colour is the quick way to add colour still with the high acoustic properties you need.

Putting colour into the picture

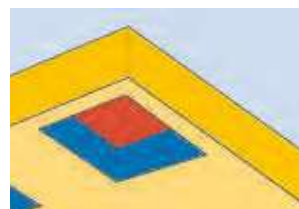

The unique prefabrication offers decisive advantages:

- Even colouration of the inner surfaces of the perforation
- Available in many shades of colour
- No time-consuming reworking after painting

Vogl Colour Panel offers the possibility of factory-applied or on-site colouring with colour combinations for finishing coat, inner perforation and fleece colour.

The finishing coat is always applied by the painter on-site.

Benefits of the Vogl Colour Panel:

- Perfectly sealed surfaces and properly coloured inner perforation surfaces
- Enormous time saving due to elimination of several work steps
- Satisfies highest aesthetic demands
