

Vogl Toptec

Acoustic Plaster Ceiling System

Vogl Toptec is a monolithic plaster system with highly effective acoustic properties, without any visible perforations.

Designed by German ceiling experts Vogl Deckensysteme, Vogl Toptec is a complete system that offers unparalleled reliability with installation and performance.

Vogl Toptec Benefits

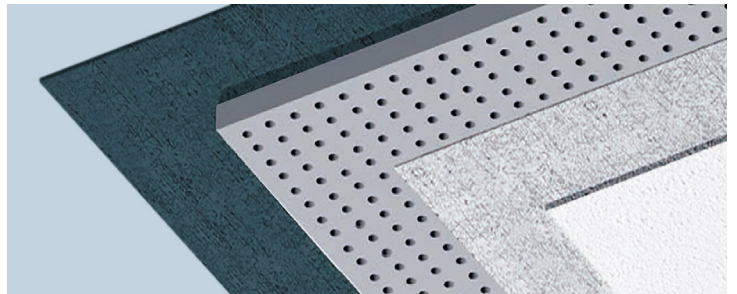

- > Solid Monolithic Finish
- > No Visible Perforations
- > Highly Effective Acoustics
- > Fine Surface Texture
- > Unlimited Colour Choices

Multi-Layered Acoustic Plaster System

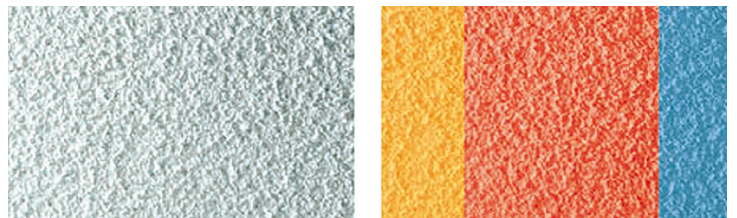

Vogl Toptec uses a clever 4-layered system that works together to create the seamless monolithic look you want with the noise reduction properties you need. The Acoustic Plaster layer is sprayed on to give a seamless look.

Atkar Group can supply all the system components required for a seamless installation on site.

Finish Options

Vogl Toptec gives a smooth plaster-like finish with a very fine grain size of 0.5 to 0.8mm. This surface texture is machine applied with the choice of the standard natural colour (white) or coloured pigment according to RAL colour charts.

Grain size 0.5 to 0.8 mm gives very fine surface texture
